

WHAT IS CHADIS?

Your doctor's office has asked you to fill out online forms before your next visit. What are they and why should you care?

You have limited time with your health provider and they want to make the most of it. The questionnaires on CHADIS provide them some of the information they need to identify any potential issues early and provide you or your children the best possible care.

Using your smartphone, tablet, or computer, with CHADIS you can:

1 LIST YOUR CONCERNS

When you fill out your CHADIS questionnaires, this is a time you can communicate to your health team any health concerns and define the purpose of your visit.

2 PROVIDE YOUR HEALTH HISTORY

The office may ask you to give or update your health history or tell them about any changes in your health since your last visit.

3 FILL OUT HEALTH RELATED QUESTIONNAIRES

The CHADIS questionnaires may ask you questions about your physical or emotional health and will help your health care provider plan how to direct your visit and provide you with the highest level of health care. If this is a visit for your child, the questionnaires will also help show how your child is developing for their age. Teens have their own private access to fill out their questionnaire and allows them to be more open about their concerns.

4 INVITE TEACHERS OR CAREGIVERS TO FILL OUT QUESTIONNAIRES

Teachers and caregivers can fill out questionnaires for your child which will provide a larger picture of your child's health and behavior needs and increase their ability to succeed.

5 ACCESS EDUCATIONAL MATERIALS OR RESOURCES FROM THE CHADIS CARE PORTAL

Capture your child's special memories and achievements in a keepsake format, find suggested educational activities based on your child's development, access necessary educational paperwork, access local or national resources and other interesting educational materials.
